Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

INDEX TO VOL. III.

N. B. — *New* genera and species are in *Italics*.

A.

Academy, manuscript pamphlets referring to early meetings of the, 349.
Acicalyptus, 127.
Acids, Fatty, on the oleic acid series of, 349.
Agassiz, Louis. Diversity of origin of human race, 7. On the Allantois, 15. On organic tissues, 21. Cyprinodonts, 42. On cell-segmentation, 46. On cartilaginous fishes, 63. Cestracion, 65. New red sandstone, 69. Phenomena accompanying the first appearance of a circulating system, 166. Classification of Polyps, 187. Classification in Zoölogy, 221. Orthagoriscus Mola, 319. The glanis of Aristotle, 325. On the general characters of orders in the classification of the Animal Kingdom, 346. On the death of Francis C. Gray, 347. On the correspondence of different stages of embryonic development with the different stages of geological succession, 353. On De Beaumont's theory, 355. The order to which Ammonites belong, 356. The family of Naiades, 378.
Ages of trees, as known from their rings, 335.
Allantois, on the formation and function of the, 12.
Alsia, 184.
Californica, 185.
Aluminum, 127, 221, 255.
Amaroria, 51.
Ammonites, to which order of the Cephalopoda do they belong? 356.
Anhalonium, 270.
Anorthoscope, 162.
Aphides, researches on the development of, 55.
Arago, François, decease of, 62.

Ariocarpus, 270.
Arrowroot, 116.
Arsenic, octohedral crystals of, 204.
Astronidium, 53.
Astronomical Journal, 5.
Atomic weights of the elements, 83.
Atomic weights, the numerical relation between the, with some thoughts on the classification of the chemical elements, 90.

B.

Babbage's Calculating Engine, 389.
Bacon, J. Observations on the oil contained in the Crustaceans found in the Cochituate water, 178.
Beck, Charles. Petronius Arbiter, 254.
Bigelow, Jacob. On epidemics, 35. The cause of the death of Pliny the Elder, 336.
Binocular combination, 213.
Bioscope, on the, 106.
Bleeders, 61.
Bond, G. P. Observations for curves of terrestrial magnetism, 186. Planet Saturn, 186. Disturbance of the horizontality of the axis of the Great Equatorial at Cambridge, 194. Effect of the Moon's attraction, 194. On the use of equivalent factors in the method of least squares, 251. The results of the photography of the stars Mizar and Alcor, 386.
Brackenridgea Hookeri, 51.
nitida, 51.
Burnett, W. J. Formation and function of the Allantois, 12. On cartilaginous and osseous tissues, 17. On the signification of cell-segmentation, and the relations of this process to the phenomena of reproduction, 43. Researches on the development of the Aphides, 55. On the intimate structure of muscle, 61. On the development of organs, 64. Decease of, 163.

C.

Cactaceæ, synopsis of the, of the Territory of the United States, 259. Additions, 345.
Cactus, spec., 259, 264, 299, 301, 306.

Cactus Region, geography of the, of the United States, 311.
Calculating Engine of Babbage, 389.
CALDWELL, GEORGE C. On the oleic acid series of fatty acids, 349.
Carbonaceous deposit, 379.
Cell-segmentation, on the signification of, 43.
Cereus, 278.
Subgen. Echinocereus, 278.
acifer, 284.
adustus, 280.
Berlandieri, 286, 314.
cæspitosus, 280.
chloranthus, 278.
conoideus, 284.
ctenoides, 279.
dasyacanthus, 279.
dubius, 282.
Engelmanni, 283.
enneacanthus, 282.
Fendleri, 281.
gonacanthus, 283.
hexaedrus, 285.
longisetus, 280.
Mojavensis, 281.
paucispinus, 285.
pectinatus, 279.
pentalophus, 314.
phœniceus, 284.
polyacanthus, 284.
procumbens, 286.
Rœmeri, 285.
rufispinus, 280.
stramineus, 282.
triglochidiatus, 283.
tuberosus, 286.
viridiflorus, 278.
Subgen. *Eucereus*, 286.
Emoryi, 286.
Greggii, 287.
variabilis, 287.

Subgen. *Lepidocereus*, 287.
giganteus, 287.
Thurberi, 288.
Subgen. *Pilocereus*, 288.
Schottii, 288.
Cestracion, 65.
CHANNING, W. F. On photographic pictures, 2. On the velocity of sound, 26. On the Ericsson engine, 32. On Magneto-electric machines, 90.
Chemical analysis, apparatus for, 70.
Chemical interest, on some points of, connected with the manufacture of ductile iron, 341.
Circulating system, on the phenomena accompanying the first appearance of, 166.
Cochituate water, change which has taken place in, 173.
Cochituate water, oil contained in the Crustaceans found in the, 178, 252, 253.
Coins of Athens, 215.
Coke of Richmond, 106.
COLE, THOMAS, decease of, 10.
COMMUNICATIONS from
Agassiz, L., 6, 7, 23, 42, 46, 63, 65, 69, 85, 166, 185, 187, 192, 194, 204, 221, 319, 325, 347, 353, 356, 379.
Bacon, J., 178.
Beck, Charles, 254.
Bigelow, Jacob, 336.
Bond, G. P., 186, 194, 251, 386.
Bowen, Francis, 357.
Burnett, W. J., 12, 17, 43, 55, 61, 64.
Caldwell, George C., 349.
Channing, W. F., 2, 26, 32, 90.
Cooke, J. P., 70, 83, 86, 90, 159, 204.
Durkee, Silas, 168, 320.
Engelmann, George, 259, 311.
Eustis, H. L., 10, 22, 251.
Felton, C. C., 173, 210, 215, 333, 371.
Gould, A. A., 61, 109, 253.
Gould, B. A., Jr., 47, 131, 167.
Gray, Asa, 34, 41, 48, 73, 90, 94, 127, 159, 166, 181, 258, 335.

Hall, James, 204.
Hayes, A. A., 85, 92, 108, 162, 173, 190, 198, 199, 221, 322, 336, 341, 355, 379.
Hayward, George, 60.
Henry, Joseph, 198.
Hitchcock, President, 3, 325.
Holmes, O. W., 5, 334, 355.
Horsford, E. N., 34, 88, 89, 109, 127, 185, 321, 364.
Hunt, T. S., 192.
Jackson, Charles, Jr., 31.
Jackson, C. T., 68, 162, 193, 196, 252, 255, 322.
Jenks, Dr., 320.
Kneeland, Dr., 108.
Leidy, Dr., 10.
Lovering, Joseph, 22, 38, 106, 107, 160, 169, 187, 206, 225, 229, 320, 383.
Peirce, Benjamin, 8, 9, 10, 25, 28, 31, 37, 64, 67, 83, 85.
Pickering, Dr. C., 382.
Rogers, William B., 81, 106, 186, 213, 220, 315, 319.
Sequard, Brown, 24.
Treadwell, D., 33, 91.
Winlock, Joseph, 25.
Wyman, Jeffries, 9, 25, 35, 60, 61, 68, 89, 162, 167, 255.
Wyman, Morrill, 11.
Conservation of force, 389.
Contractility, cause of, in vegetable tissues, 167.
Cooke, J. P. Apparatus for conducting filtration *in vacuo*, 71. On atomic weights of the elements, 83. On a crystal of rhombic arsenic, 86. The numerical relation between the atomic weights, with some thoughts on the classification of the chemical elements, 90. On stibiobizincyle and stibiotrizincyle, 159. Octohedral crystals of arsenic, 204.
Corn-starch, 112.
Crystal of rhombic arsenic, 86.
Culex pipiens, 168.
Curves, on relation of, 83.
Cyprinodonts, fam., 42.

D.

De Beaumont's theory of the elevation of mountain chains, 355.
Decease of Fellows, Associate Fellows, and Foreign Honorary Members, 38, 40, 61, 131, 163, 164, 195, 224, 256, 347.
Diclidocarpus, 48.
Dighton rock, the removing of, 322.
Donation, 26, 168.
Draytonia, 49.
DURKEE, SILAS. On Culex pipiens, 168.

E.

Ear, on the voluntary motion of, in man, 355.
Echinocactus, 271.
bicolor, 277.
brevi-hamatus, 271.
cylindraceus, 275.
Emoryi, 275.
flexispinus, 273.
hamatocanthus, 273.
hamatus, 272.
horizonthalonius, 276.
ingens, 275.
intertextus, 277.
Lecontei, 274.
Lindheimeri, 276.
longehamatus, 273.
Muhlenpfordtii, 272.
Parryi, 276.
pectinatus, 279.
polyancistrus, 272.
polycephalus, 276.
Scheerii, 271.
setispinus, 272.
sinuatus, 273.
Texensis, 276.
Treculianus, 273.
uncinatus, 272.

unguispinus, 278.
viridescens, 275.
Whipplei, 271.
Wislizeni, 274.
Echinocereus radians, 280.
Effluvia, ashes, &c., emitted by volcanoes, nature of, 337.
Elastic sacs, the forms assumed by, 8, 10.
Electrical currents, the induction of, 198.
Ellipse, the property of, 10.
ENGELMANN, GEORGE. Synopsis of the Cactacæ of the United States, 259. Geography of the Cactus region of the United States, 311.
Epidemics, cause of, 35.
Equation, personal, on the means of diminishing the, 47.
Ericsson engine, on the, 28, 31, 33.
EUSTIS, H. L. On the property of the ellipse, 10. Formula for the measure of the solidity of a prismoid, 22. On a case of warped surfaces, 251.
EVERETT, EDWARD. Changes in the locality of the solfa-taras, 337.

F.

Fall of Troy, two distinct dates of, 382.
Families, similarity of form essential, 379.
FARRAR, JOHN, decease of, 38.
FELLOWS elected.
Adams, Charles Francis, 356.
Arnold, Albert N., 205.
Boutwell, George S., 356.
Brewer, Thomas M., 167.
Cary, Thomas G., 257.
Child, Francis J., 205.
Choate, Rufus, 167.
Clark, Henry James, 326.
Cooke, Josiah Parsons, 32.
Cotting, Benjamin E., 59.
Curtis, B. R., 167.
Dexter, William P., 24.
Durkee, Silas, 167.
Ellis, George E., 257.

Frothingham, N. L., 335.
Gould, Benjamin A., 335.
Gray, John C., 205.
Greenough, Richard, 205.
Henck, John B., 257.
Hill, Thomas, 48.
Lee, William Raymond, 42.
Livermore, George, 185.
Lowell, James Russell, 205.
Motley, J. Lothrop, 356.
Parker, Joel, 32.
Parkman, Francis, 195.
Parkman, Samuel, 59.
Peabody, Ephraim, 167.
Peters, C. H. F., 326.
Sophocles, E. A., 335.
Sprague, Charles James, 257.
Stearns, William A., 205.
Torrey, Henry W., 335.
Ware, Charles E., 167.
Winlock, Joseph, 48.
Fellows, Associate, elected.
Bryant, William C., 212.
Crawford, Thomas, 212.
Curtis, Moses A., 212.
Dalton, J. C., Jr., 212.
Hayes, Isaac, 346.
Hickok, Laurens P., 346.
Irving, Washington, 212.
Kirtland, J. P., 212.
Mahan, Dennis H., 212.
Powers, Hiram, 212.
Short, Charles W., 212.
Wood, George B., 346.
Felton, C. C. The present aspect of Greece, 173. On the Pnyx and Bema at Athens, 210. On silver coins of Athens, 215. Menander in New York, 371.
Fishes, cartilaginous, living and fossil, 63.
Fœtal child, transformation of, into phosphorus, 321.

Food, on the value of different kinds of prepared vegetable, 109.
arrowroot, 116.
corn-starch, 112, 113.
farina, 123.
maccaroni, 121.
prepared potato, 122.
rice flour, 120.
sago, 117.
tapioca, 114.
wheat-starch, 119.
Footprints of birds, 193.
Force, on the measure of, 91.
Fossil bones, 109.
Fossil bones of birds, 9.
Fossil fruits and seeds, 3.
Fossils, new species of, 204.
Fusel-oil compound, 11.

G.

Gauss, C. F., decease of, 195.
Gentianaceæ, on the placentation of, 258.
Glanis, 325.
Gold, at Bridgewater, Vt., 162.
Gould, A. A. On fossil bones, 109. Ejection of living animals from the human stomach, 253.
Gould, B. A., Jr. On personal equation, 47. On error in transit observations, 48. Misapplication of remarks on record at a previous meeting, 131. Elements of the fourth comet of 1854, 167.
Gray, Asa. On Trichomanes, 34. Characters of some new genera of plants collected in the exploring expedition under Captain Wilkes, 48, 127. Spongilla, 90. California Coniferous tree, 94. Characters of some new genera and species of plants in a collection, made chiefly in New Mexico, Southwest California, and Sonora, by George Thurber, 159. Note on the characters and affinities of Vavæa, 166. Placentation of certain Gentianaceæ, 258.
Gutta percha, on rendering it elastic, 88.

H.

HALL, JAMES. Fossils, new species of, 204.
Haplopetalon, 53.
HARRIS, DR. THADDEUS WILLIAM, decease of, 224.
HAYES, A. A. On the disappearance of marsh gas, 85. On photometer, 92. On a patent process for the preservation of the juice of the India-rubber-tree from decomposition, 108. New process of coating iron with copper, 162. Change in Cochituate water, 173. A new species of wax, 190. On hydro-electric currents, 198. On a specimen of native iron from Liberia, 199. On aluminium, 221. Change of position among the particles of metal induced by the percussion of the masses they form, 322. Nature of effluvia and ashes emitted by volcanoes, 336. On some points of chemical interest, connected with the manufacture of ductile iron, 341. Telegraph cable, 355. Carbonaceous deposit, 379.
HAYWARD, GEORGE. Hydrophobia, 60.
Hedgcock's quadrant, 378. Report on, 384.
HENRY, JOSEPH. On the induction of electrical currents, 198.
Heterandria, 43.
HITCHCOCK, PRESIDENT. Fossil fruits and seeds, 3.
HOLMES, O. W. On the microscope, 5. On the voluntary motion of the ear in man, 355. Stand for a microscope, 385.
HORSFORD, E. N. Leprosy, 34. On rendering gutta percha elastic, 88. On the nutritive value of amylaceous articles of food, 89. Incrustation of Cochituate water-pipes, 89. On the value of different kinds of prepared vegetable food, 109. Aluminum, 127. Transformation of a fœtal child into phosphorus, 321. The value of saltpetre for the manufacture of nitric acid, 354.
Hydrophobia, 60.

I.

Incrustation, ferruginous, of the Cochituate water-pipes, 89.
Indian arrow-heads, 322.
India-rubber, on the preservation of, 108.
Inscription, Runic, 319.
Invitation from the Committee on the Inauguration of the Statue of Franklin, 320.
Iron from Liberia, 199.

Iron, on some points of chemical interest connected with the manufacture of, 341.

J.

Jackson, Charles, Jr. On the Ericsson engine, 31.
Jackson, C. T. On copper and gold mines, 68. Analysis of water, 196. Crustacea in the Cochituate water, 251.

K.

Kneeland, Dr. S. On the original diversity of the human races, 108.

L.

Least Squares, on the use of equivalent factors in the method of, 251.
Lectures, to be given by Fellows of the Academy, 6, 17, 27, 87.
Leprosy, 34.
Library, donations to, by
Abbot, S. L., 251.
Abert, J. J., 150.
Academia Naturæ Curiosorum, Breslau, 140, 246, 368, 371.
Académie d'Archéologie de Belgique, 60, 152.
Académie des Sciences de l'Institut Imp. de France, 139, 236, 358.
Académie Impériale des Sciences de Saint Petersbourg, 135, 240.
Académie Nationale des Sciences, &c. de Lyon, 347.
Academy, Imperial, of Sciences, Vienna, 139, 237, 361.
Academy, Imperial, of Sciences, Arts, and Belles-Lettres, Caen, 234, 364.
Academy, Imperial, of Sciences, Belles-Lettres, and Arts, Lyons, 368.
Academy of Natural Sciences, Philadelphia, 135, 156, 233, 362.
Academy of Science of St. Louis, Missouri, 370.
Academy of Sciences, Arts, and Belles-Lettres, Dijon, 156, 234, 364.
Academy of Sciences of Rouen, 245.
Academy, Royal Bavarian, 157, 237, 363.
Academy, Royal Danish, 140, 370.
Academy, Royal Irish, 144, 245, 366.
Academy, Royal, of Sciences, Belgium, 147, 246.
Academy, Royal, of Sciences, Madrid, 364.

Academy, Royal, of Sciences, Naples, 369.
Academy, Royal, of Sciences, Stockholm, 144, 251, 368, 371.
Academy, Royal Prussian, 139, 367.
Acland, Dr. Henry Wentworth, 369.
Adams, C. B., 138.
Administration of Mines of Russia, 136, 240, 359.
Andrews, J. D., 152.
Appleton, Nathan, 358.
Association, American, for the Advancement of Science, 138, 248.
Association, British, for the Advancement of Science, 139, 240, 366.
Association, Mercantile Library, New York, 363.
Bache, A. D., 152, 235.
